I search for meaning and signification. How is an action — whether performed by an individual or a collective — a signifier of meaning, situated in its particular context? I seek answers to this question, and am more than happy to do so computationally

Areas of Interest

- Qualitative and quantitative research design.
- Social interactions, and their signifiers of meaning.
- Computer-assisted social research, in particular Natural Language Processing and Machine Learning.

Education

2020 **Educational Sociology**, Master of Arts, Aarhus University, Aarhus
Specialized in a critical look at the state of Danish dis/ability policies. In addition, I explored computational sociology, and R and the tidyverse.

2012 **Social Education**, Bachelor of Arts, University College Nordjylland, Ålborg
Specialized in citizens with disability, with a particular focus on the role of the practitioner.

Experience

2012–ongoing Skovbo, Sødisbakke
Social Worker
Mariager

I work in an assisted living facility for adults with autism spectrum disorders and severe mental impairment.
