I search for meaning and signification. How is an action — wether performed by an individual or a collective — a signifier of meaning, situated in it's particular context? I seek answers to this question, and am more than happy to do so computationally

- Qualitative and quantitative research design.
- · Social interactions, and their signifiers of meaning.
- Computer-assisted social research, in particular Natural Language Processing and Machine Learning.

Skovbo, Sødisbakke 2012-ongoing Social Worker

2020

2012

Mariager

I work in an assisted living facility for adults with autism spectrum disorders and severe mental impairment.

**Educational Sociology**, Master of Arts

*Århus University*, Århus

Had a critical look at the state of Danish dis/ability policies. In addition, i explored computational sociology, and R and the tidyverse.

Social Education, Bachelor of Arts University College Nordjylland, Aalborg of the practitioner.

Specialized in citizens with disability, with a particular focus on the role
